**EARNINGS** 

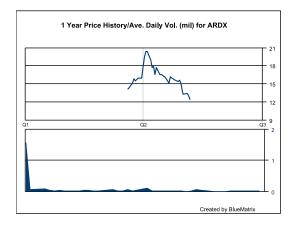

## ARDELYX, INC.

2Q EPS: Low Cash Burn & Milestone Payment from AZN

- Bottom Line: This morning ARDX reported 2Q'14 net income of ~\$3.8m vs. our est of -\$2.7m. The increase was attributed to the recognition of licensing revenue related to a 1x milestone payment from AZN (MP). In the press release the company provided updates on 1) the receipt of a \$25m milestone from AZN for the initiation of a Ph. 2b trial investigating tenapanor in ESRD-Pi 2) reiterated timelines for topline Ph. 2 data for its lead tenapanor programs 3) net proceeds from the company's recent IPO of ~\$61m which further boosted ARDX's cash balance to ~\$118m. We remain OP with a \$32/ shr price target.
- No major pipeline updates; mgmt reiterated key dates for tenapanor programs. Mgmt expects top line data from its Ph. 2b program for IBS-C in 4Q'14 & data from its Ph. 2b ESRD-Pi in 1H'15. ARDX is partnered with AZN for tenapanor and AZN has agreed to fully fund tenapanor's development. ARDX is eligible for up to ~\$200m in development milestones and tiered royalties (in teens) once approved.
- Tenapanor targets kidney disease indications representing a significant market opportunity with many unmet needs. Approx. ~300K dialysis patients in the US are taking phosphate binders and we expect this population to increase due to: 1) increase in obesity/ diabetes 2 causes of end stage renal disease [ESRD]; 2) aging population. The US market in '13 for phosphate binders was approximately ~\$1 billion (net sales). There are significant unmet needs in this market. Current marketed products have many unwanted side effects such as: 1) GI issues; 2) hypercalcemia leading to vascular calcification; 3) pill burden patients are required to take ~9-10 phosphate binders a day. We expect tenapanor to gain approx ~30% share and forecast risk adj. (probability of success [POS]: 35%) peak sales of ~\$148m by '30. ARDX also intends to develop tenapanor for chronic kidney disease (CKD) stage 3/4 pts (~2m pts in the US) and has blockbuster pot'l; we est risk adj. (POS: 25%) peak sales of ~\$660m in '30.
- Cash burn was in line with our ests; recent IPO should provide ARDX enough runway to hit key milestones. ARDX currently has ~ \$118m in cash; total opex was ~\$6.4m vs our est. of ~\$7.7m and with a continued low burn rate and non-dilutive cash flow from the AZN deal we expect ARDX to have enough resources to reach key milestones and provide investors upside over the next 1-2 yrs.
- Changes to our model: We updated our model to reflect 1) an increase in licensing revenue based on AZN milestone payments for FY'14 & 2) an updated share count.

Revenue in \$MM.

### **INVESTMENT THESIS**

We rate ARDX with an Outperform rating and a \$32 price target in 12 months. ARDX is partnered with AZN on its lead program, tenapanor, a small molecule inhibitor of NHE3, which is one of the main transporters of sodium in the GI tract. With emerging data suggesting maintenance of a low sodium diet can provide therapeutic benefit in kidney disease patients, tenapanor holds the promise of addressing an important unmet need in the multi-billion dollar kidney disease market, as well as potential utility in constipation predominant irritable bowel syndrome (IBS). While AZN owns WW commercialization rights on tenapanor, ARDX may receive up to ~\$225m in development milestones and tiered royalties (in "teens"). We are bullish ahead of Phase II data for tenapanor, which MEDACorp Key Opinion Leaders (KOL) believe will help establish tenapanor's profile as a blockbuster drug, based on potential for: (1) efficacy similar to marketed phosphate binders; (2) reduction in sodium absorption; & (3) reduce the pill burden associated with current meds. Longer term, ARDX plans to invest in its proprietary drug discovery platform and develop wholly owned assets.

### **VALUATION**

Our ~\$32/shr price target on ARDX shares is based on our risk-adjusted, sum-of-the-parts DCF analysis through 2025E. We used a 15% discount rate, and we estimate tenapanor will achieve market shares of 30%, 40%, and 5% in the ESRD-Pi, sodium, and fluid overload chronic kidney disease (CKD) and IBS-C indications, respectively. Risks to Valuation: (1) tenapanor drives our valuation and clinical/regulatory failure would significantly impact

### **RISKS TO VALUATION**

Risks include (1) tenapanor drives our valuation and clinical/regulatory failure would significantly impact our valuation; (2) AZN may not commit to funding all the currently envisioned indications, depending on strength of future data.

# **Disclosures Appendix Analyst Certification**

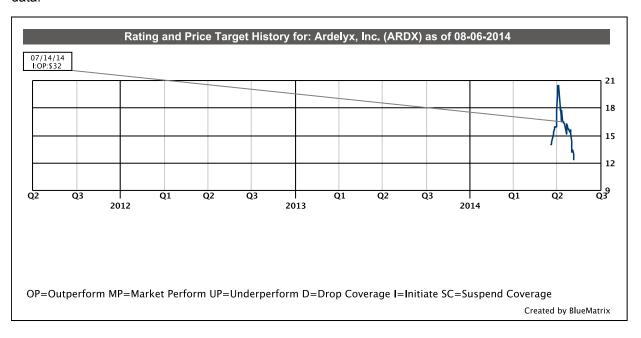

I, Jason M. Gerberry, JD, certify that the views expressed in this report accurately reflect my views and that no part of my compensation was, is, or will be directly related to the specific recommendation or views contained in this report.

### **Valuation**

Our ~\$32/shr price target on ARDX shares is based on our risk-adjusted, sum-of-the-parts DCF analysis through 2025E. We used a 15% discount rate, and we estimate tenapanor will achieve market shares of 30%, 40%, and 5% in the ESRD-Pi, sodium, and fluid overload chronic kidney disease (CKD) and IBS-C indications, respectively.

### **Risks to Valuation**

Risks to Valuation: (1) tenapanor drives our valuation and clinical/regulatory failure would significantly impact our valuation; (2) AZN may not commit to funding all the currently envisioned indications, depending on strength of future data.

## **Explanation of Ratings**

Outperform (Buy): We expect this stock to outperform its benchmark over the next 12 months.

<u>Market Perform (Hold/Neutral):</u> We expect this stock to perform in line with its benchmark over the next 12 months.

<u>Underperform (Sell):</u> We expect this stock to underperform its benchmark over the next 12 months. The degree of outperformance or underperformance required to warrant an Outperform or an Underperform rating should be commensurate with the risk profile of the company.

For the purposes of these definitions the relevant benchmark will be the S&P 600® Health Care Index for issuers with a market capitalization of less than \$2 billion and the S&P 500® Health Care Index for issuers with a market capitalization over \$2 billion.

## **Important Disclosures**

This information (including, but not limited to, prices, quotes and statistics) has been obtained from sources that we believe reliable, but we do not represent that it is accurate or complete and it should not be relied upon as such. All information is subject to change without notice. This is provided for information purposes only and should not be regarded as an offer to sell or as a solicitation of an offer to buy any product to which this information relates. The Firm, its officers, directors, employees, proprietary accounts and affiliates may have a position, long or short, in the securities referred to in this report, and/or other related securities, and from time to time may increase or decrease the position or express a view that is contrary to that contained in this report. The Firm's salespeople, traders and other professionals may provide oral or written market commentary or trading strategies that are contrary to opinions expressed in this report. The Firm's proprietary accounts may make investment decisions that are inconsistent with the opinions expressed in this report. The past performance of securities does not guarantee or predict future performance. Transaction strategies described herein may not be suitable for all investors. Additional information is available upon request by contacting the Editorial Department at One Federal Street, 37th Floor, Boston, MA 02110.

Like all Firm employees, analysts receive compensation that is impacted by, among other factors, overall firm profitability, which includes revenues from, among other business units, Institutional Equities, and Investment Banking. Analysts, however, are not compensated for a specific investment banking services transaction.
